INOX Plate Button

The kit INOX plate for VoiceBOX allows an easy installation of Digicom "speak/listen" into the Lift cabin.
With few and simple operations your lift will be complete.
Particulary indicated for modernizations where it is necessary to install the remote alarm system in reduced spaces.
With its 20 mm thickness it can be easily placed in the cabin witouth moving the buttons plate.
The **SOS button that complies EN 81-28 and EN 81-70 regulations** has a double contact for the connection of the emergency bell usually present in the lift.
By pressing the SOS button you **will activate at the same time both the lift alarm transmission and the local bell**.
The installation kit includes all the necessary to complete the operation: screws, cables to connect the button and the hex key for the closing of the lower cap.

THE INSTALLATION KIT INCLUDES:

- 1 INOX Plate with no logo
- 1 Lift alarm button with double contact and bell pictogram
- 2 top/bottom fixing caps
- 2 supports for the plate mounting
- 2 screws for Voicebox mounting to the plate
- 3 thread screws for the plate mounting
